

HARISANKER A

GENERATIVE AI

AI/ML ENGINEER | CLOUD DEVOPS |

harisanikeranil12@gmail.com • linkedin.com/in/harisankera • github.com/haryyy7 • Kerala, India

SUMMARY

Motivated B.Tech Computer Science graduate with hands-on experience in Python, C, SQL, and project-based software development. Strong interest in building scalable applications, learning cloud and DevOps tools, and solving real-world problems through technology. Seeking an entry-level Software Engineer role to contribute technical skills, grow in a collaborative environment, and deliver impactful solutions.

PROJECTS

Brain Tumor Classification (HybViT-Xception)^{2025 – 2026}

AI/ML Research | Python, PyTorch, Vision Transformers, CNN, Gradio, Hugging Face

- Designed a hybrid deep learning architecture combining Vision Transformer (ViT) and Xception CNN for MRI-based brain tumor classification, specifically targeting glioma detection with high diagnostic precision.
- Presented research findings at Tagore International Conference 2026, SRM Institute of Science and Technology, Chennai as a peer-reviewed academic contribution on medical AI.
- Deployed an interactive inference application on Hugging Face Spaces using a Gradio interface, enabling real-time brain tumor classification from uploaded MRI images via a public-access URL.

WizardPRO — Trading Intelligence PWA^{2025 – 2026}

FinTech | HTML, CSS, JavaScript, Progressive Web App, Vercel

- Built a mobile-first Progressive Web App (PWA) for Indian equity traders, unifying five analytical modules including technical analysis, intraday signals, and pattern recognition into a single browser-native interface.
- Implemented a zero-dependency, fully offline-capable architecture with print-to-PDF daily reporting, dark/light theming, and iOS/Android installability — no backend required.
- Deployed on Vercel with optimized load performance and a layout specifically designed for small-screen trading workflows.

DropShip India — AI-Powered Dropshipping SaaS (MVP)²⁰²⁶

Full-Stack SaaS | MERN Stack, Python, Docker, Supabase, Vercel

- Architecting a full-stack SaaS platform for Indian dropshippers with AI-powered product discovery tools and an ML-based Return to Origin (RTO) risk prediction model targeting tier 2/3/4 city delivery challenges.
- Integrating logistics APIs from Delhivery and Shiprocket alongside Shopify-compatible storefront functionality and a hand-curated weekly product catalog for underserved e-commerce markets in semi-urban India.

EDUCATION

SRM Institute of Science and Technology^{Chennai, India}

Bachelor of Technology in Computer Science & Engineering

Jun 2022- Jun 2026

CERTIFICATIONS

AWS Certified AI Practitioner (AIF-C01) | Amazon Web Services^{Sep 2025}

AWS Educate: Introduction to Generative AI | Amazon Web Services^{Sep 2025}

IBM Data Science Orientation | IBM^{Nov 2023}

AWS Academy Graduate: Machine Learning Foundations | Amazon Web Services^{Apr 2023}

SKILLS

AI / ML: Python, PyTorch, TensorFlow, Vision Transformers (ViT), CNNs, Hugging Face, Gradio, Kaggle

Cloud & DevOps: Docker, Kubernetes, Linux, Bash Scripting, CI/CD Pipelines, GitHub Actions, Jenkins, Ansible, Terraform

Development: HTML, CSS, JavaScript, MERN Stack, REST APIs, Vercel, Supabase, Pinecone, Git, GitHub

Other: Algorithmic Trading, Technical Analysis, SaaS Product Design, Prompt Engineering, No-Code / Low-Code Automation
